MOHAMMAD NABI NOORZAI

Software Engineer | Full-Stack Web Developer

San Diego, CA | mnoorzai21@gmail.com | linkedin.com/in/mnoorzai21 | github.com/mnoorzai21 | Portfolio

SUMMARY

Computer Science graduate (SDSU, 2025) who builds and ships full-stack web applications with React, Node.js and GraphQL, including a real-time stock market scanner. Writes tested code with CI/CD and is seeking software engineering, frontend or full-stack roles, remote or in San Diego.

TECHNICAL SKILLS

Languages: JavaScript, Java, C/C++, Python, SQL, HTML, CSS

Frontend: React, Vite, Apollo Client, Bootstrap, responsive design

Backend: Node.js, Express, REST APIs, GraphQL (Apollo Server), JWT authentication

Databases: MongoDB (Mongoose, Atlas), MySQL

Testing & DevOps: Node test runner, GitHub Actions CI/CD, Git, Render, GitHub Pages, Linux

EXPERIENCE

Sheek Media | Software Engineer — San Diego, CA | Dec 2024 – May 2025

- Built reusable React components and developed responsive websites for company projects.
- Debugged and fixed front-end issues across browsers and screen sizes, improving site reliability.
- Tested new features before release to catch bugs early and keep deployments stable.

PROJECTS

Stock Scanner | *React*, *Vite*, *Node.js*, *Express*, *market data APIs* — github.com/mnoorzai21/stock-scanner

- Built a real-time momentum scanner that screens ~10,000 U.S. stocks every minute on five filters (price, % gain, relative volume, share float, news) and sends sound and desktop alerts.
- Cut market-data API calls per candidate from 21 to one batched request and added server-side caching, so full scans typically finish in under 10 seconds and multiple viewers share one result.
- Fixed a premarket bug that measured gains against the wrong previous close; added 31 automated tests and CI/CD to GitHub Pages and Render.

Book Search | *React*, *Apollo GraphQL*, *Express*, *MongoDB Atlas*, *JWT*, *Render* — book-searchjet.onrender.com

- Full-stack reading-list app with sign-up, login (JWT, bcrypt) and saved books, backed by a GraphQL API.
- Migrated the app from Heroku to free Render + MongoDB Atlas hosting, upgrading to Apollo Server 5, Express 5, Mongoose 8 and Vite.
- Moved Google Books search to a cached server-side query with a private API key; added 12 API tests against an in-memory MongoDB.

Weather Dashboard | *JavaScript*, *Express*, *OpenWeatherMap API* — weather-dashboard-mnn.onrender.com

- City search with current conditions, five-day forecast and saved search history.

EDUCATION

San Diego State University | B.S. Computer Science — May 2025

San Diego Mesa College | A.S. Computer Science

University of California San Diego | Certificate, Web Development
